

STROBE-BRIK™

Thru-wall sleeve mounting, MB-009

For use with SB-002QD xenon and SB-010QD LED strobes

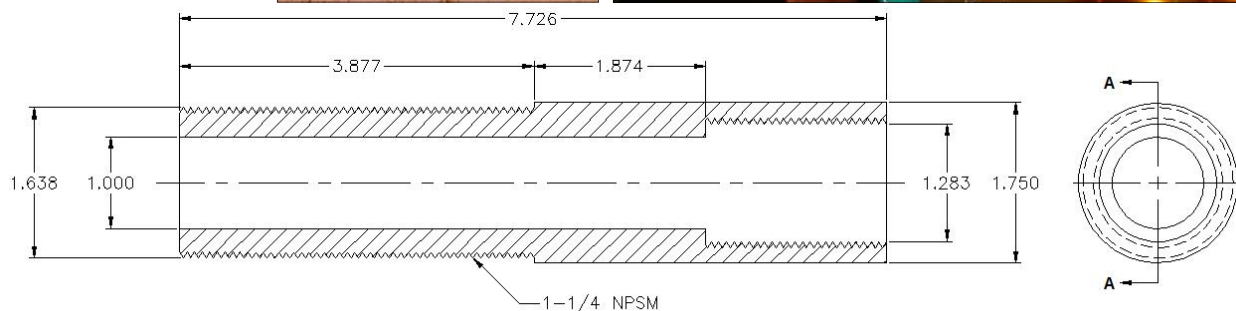

The MB-009 Thru-wall sleeve is a rugged facility mounting solution providing an architectural moisture-resistant barrier. The stainless-steel sleeve allows for exacting recessed placement along the facility exterior, and provides for both a rear strobe cable feed and front strobe maintenance access. This assembly has been 3rd-party tested and architect-approved as a facility moisture barrier mounting system for the Strobe-Brik strobes.

Sleeve assembly includes:

- Stainless-steel sleeve
- Stainless-steel compression fitting
- O-ring
- Compression fitting key

For use with these strobes:

- SB-002QD xenon
- SB-010QD LED
